I want to make sure veryone feels weldown and accommodated for whether you're a complete hepinner, the next Candide Thorses and everyone in between. If dike to this, I're super approachable and weldowning and can't wait to get involved in recruiting and supporting next yars soor warriors. I also work as a ski shop and before than a renail abops so everything ak gase in my ninhe and if you're lokey I anglit manage tog yo as discourt (Bod wit Edit polsos).

What would I do as Capata? Rafly try to push the sking side of more - we all liese it for the social but the open side of it is just as good. There was so much hidden tailed on soci it would be analysis go or it at instructed from the defau. To also rearbly liese to constance with freetyle being every work - such a while all stand resonance to be are some to have a constance of the more while all stand resonance is the resonate to have free on a colore to thild a distand environment for everyone to have free on a colore to

more as we get in the wort mode. Other more for bitermodiate identity that don't necessarily want to near or compasition quality area's bigainers perlopse efficient getificent leads of lossess expectivity shared of errors as a methode for people. Tel dors to try and get some more spensors involved for gatachit etc., as we all known deligs as influencessel, requestive spectra to word by amuning so have more called its to be able to offer people access as all leads of the spect.

HinaFy, try and have the biggest team we can skiing at BUDS - I know pryone goes for the socials but the freestyle facilities and atmosphere in Edinburgh are like nowhere else int he UK committed warwick snow warrior - went on tour with pneumones
